Evolutionary Computation 2 – Advanced Algorithms And Operations

Synopsis

Evolutionary Computation 2: Advanced Algorithms and Operators expands upon the basic ideas underlying evolutionary algorithms. The focus is on fitness evaluation, constraint-handling techniques, population structures, advanced techniques in evolutionary computation, and the implementation of evolutionary algorithms. It is intended to be used by individual researchers and students in the expanding field of evolutionary computation.

Book Information

Paperback: 308 pages

Publisher: CRC Press; 1 edition (November 22, 2000)

Language: English

ISBN-10: 0750306653

ISBN-13: 978-0750306652

Product Dimensions: 6.1 x 0.7 x 9.2 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #629,220 in Books (See Top 100 in Books) #7 in Books > Computers & Technology > Programming > Algorithms > Genetic #162 in Books > Textbooks > Computer Science > Algorithms #203 in Books > Textbooks > Computer Science > Artificial Intelligence

Customer Reviews

"This second volume provides very interesting information and updated material on additional topics. It also covers some advanced techniques and discusses the efficient implementation of evolutionary algorithms." H D Hecker in Zentralblatt Math econd volume provides very interesting information and updated material on additional topics. It also covers some advanced techniques and discusses the efficient implementation of evolutionary algorithms." H D Hecker in Zentralblatt Math

Volume I provided the general theory of evolutionary computation. This second volume on the other hand aims at introducing the reader to more practical aspects of evolutionary computation. While i found the first volume great, this second volume lacked the details that are required to provide an intuition of the working of advanced evolutionary techniques. I feel that "How to solve it" by Michalewicz and Fogel and "Genetic algorithms + data structures = evolution programs" by Michalewicz both provide this experience useful to implement evolutionary techniques, by not trying

to trade-off pages for understandability. I would not recommend this book because it tries to introduce advanced aspects that are too difficult to cover in a single chapter each. If you really want to understand the practice of evolutionary techniques, you need a good intuition of how the various operators and structures work on real problems, just reading a few pages will not do the job.

Honestly, I did not read it. I look forward to have it. I gave the book five star according my evaluation to the Volume 1 and my respect to David B. Fogel.

Evolutionary Computation 2 - Advanced Algorithms and Operations
Evolutionary Algorithms for Solving Multi-Objective Problems (Genetic and Evolutionary Computation)
Evolutionary Algorithms in Theory and Practice: Evolution Strategies, Evolutionary Programming, Genetic Algorithms
Computational Ergodic Theory (Algorithms and Computation in Mathematics, Vol. 13)
Bundle of Algorithms in C++, Parts 1-5: Fundamentals, Data Structures, Sorting, Searching, and Graph Algorithms (3rd Edition) (Pts. 1-5)
Practical Algorithms in Pediatric Hematology and Oncology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Practical Algorithms in Pediatric Nephrology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Practical Algorithms in Pediatric Gastroenterology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Practical Algorithms in Pediatric Endocrinology: (Practical Algorithms in Pediatrics. Series Editor: Z. Hochberg)
Operations Research: Applications and Algorithms (with CD-ROM and InfoTrac)
Operations Research: Applications and Algorithms
Operations and Supply Chain Management: The Core (Book Only) (McGraw-Hill/Irwin Series Operations and Decision Sciences)
Operations Management in the Supply Chain: Decisions and Cases (McGraw-Hill/Irwin Series, Operations and Decision Sciences)
Operations Management (McGraw-Hill Series in Operations and Decision Sciences)
Operations Management (Operations and Decision Sciences)
OPERATIONS MANAGEMENT IN THE SUPPLY CHAIN: DECISIONS & CASES (Mcgraw-Hill Series Operations and Decision Sciences)
Managing Operations Across the Supply Chain (McGraw-Hill/Irwin Series in Operations and Decision Sciences)
Operations Management, 1e (Mcgraw-Hill Education Operations and Decision Sciences)
Loose-leaf for Operations Management (The Mcgraw-Hill Series in Operations and Decision Sciences)
Exam Prep: Hazardous Materials Awareness And Operations (Exam Prep: Hazardous Materials Awareness & Operations)
