He began his professional career with United Telecommunications (America's third-largest telecommunications company at the time) as Advertising Coordinator. After three years, he joined AT&T and served for 10 years in progressively responsible corporate leadership positions in advertising, corporate communications, and marketing management. Cates's next leadership position was with Associated Electric Cooperative, a \$2 billion electric power utility. In a sea of unverified 5-star rated sales books, you really roll the dice on what kind of book you're going to get. 5 stars to me should be a truly transformational book like SPIN or Challenger. 3-4 stars should be a good/great book with a couple of flaws. 2 stars is a middling book with obvious flaws. My rating of this book of two stars has as much to do with my disagreement with some of the themes/arguments as it does with the incongruous partitioning of material in the book. Certain chapters went into extreme detail on how to identify body language that's helpful/harmful in hiring. That particular chapter lasted 50 pages. Chapter 3 lasts almost 100 pages and dispenses recycled advice (believe in yourself, don't be a micro-manager, etc...) Chapter 7, the best chapter which covers continuous improvement, was 30 pages. While I understand that building a cohesive team that collaborates is important (the supposed thrust of this book), there are TONS of books that cover how to hire, self-improvement and leading. I was looking for more "meat" on the collaboration aspect from a sales perspective which is covered from pages 229 - page 300...or roughly 25% of the book. Lastly, I tended to disagree with a few of the major points in regards to hiring, analytics and leadership.

Max provides actionable frameworks for leaders managing the different sales roles in the enterprise

- business developers, closers, account managers. It's my go-to resource for helping my clients learn how to implement self-managed teams. Profound change awaits you if you pick up this book and start applying Max's systems, methods and frameworks.

After being a VP of Sales, consulting on sales management for 19 years and after writing four books on sales management, Max Cates, author of 7 Steps caught my attention in the first five pages. Those of you that have read my reviews before know that I score a book by the number of pages that I fold over the corners that include something I found of value; this book scored 24 folded pages! Recently I have written a lot about the emotional aspects of sales leadership, Max starts off in the first chapter on First Step: Manage Yourself, with a heading "Self-Management Question Number One: Are you a trusted leader? This emotional connection can only come first when the sales manager is under personal control. The author makes the reader evaluate themselves and understanding that without trust the emotional bond that allows a manager to coach does not exist. Without trust the relationship becomes dysfunctional. Max's style is to pose a question and then provide the reader the opportunity consider the issue with the examples/case studies and definitions, he focused on "Adaptability, Mental Toughness, Bad-Boss, Ego and EQ". And that is all in the first 40 pages! After that Max takes you into what is necessary to build an effective sales culture by giving the sales manager the specific framework on what someone needs to do to actually make it happen. His five steps with real world examples is terrific. After setting the stage, he moves into Chapter Two, High Performance Teams Begin with Hiring. This is the number one hardest part of being a sales manager and the most important. In the book Max provides the foundation for any sales manager to create the "systems" necessary to hire the right person. In my book on Recruiting I used the phrase "Hire the Best, Not the Best Available", Max does an excellent job describing how to do it! A few of his sub-titles justify this book easily: "The Science of Selection", "Hire for Traits, not Skills", "The Sixth Dimension", "Body Language", "Seven Tiebreakers", "Red Flags" see the rest of the review: [...]

What I liked about this book is the fact that everything is very practice-oriented. Clear and concise with step-by-step instructions on how to become a better sales leader. Interestingly, the first half of the chapters are all about the personal skill set and attitude of a sales leader, only then does the author go into other factors and performance metrics. The book is refreshingly lite on jargon and the

author is clearly not addicted to technology. The term "CRM" only appears six times in the entire book ! Bravo !Seven Steps to Success for Sales Managers: A Strategic Guide to Creating a Winning Sales Team Through Collaboration

Oh I wish I had this book a long time ago. Much of my hard won learning would have come so much sooner. This is The Book for sales managers. It wraps up much of the current thought on leading teams while not forgetting these are sales teams. If you are a sales manager, VP sales, CEO or aspire to be in that roles, this is must buy book for you and you have to read it. The style is easy going, realistic and you just know its useful content. What are you waiting for?
