This is the 4th volume of David Sear's 5 volume set on Roman Coins. This set is the new standard for Roman coinage from its beginnings in the 3rd Century B.C. through the 5th Century A.D. This set should be in the library of anyone who collects Roman coins. The 4th volume specifically deals with the coinage from 284 through 337 A.D., from emperor Diocletian through Constantine, a period when Roman coinage changed significantly.

I have used David Sear's ancient coin authentication service as well as his books for reference. This reference is exactly what is needed for ancient Roman coins during this time period. I focus on Roman Republics in which his Vol I covers extremely well. However, I am expanding into coins in the Early Empire period, which this Vol II covers. As I catalog my coins I use Sear's numbers to reference, although he cites all the other references with each of the listings. Excellent reference book. Period.

Fantastic for collectors of ancient coins because it has loads of photos of coins with descriptions. I

found it very hard to find such a book as this, and the price won't break your bank..

This is a very detailed compilation of Roman coins from the period around 300 ad. It is far more complete than the last edition and much easier to use than "RIC".

This book, by its author, was recommended to me by a fellow collector of ancient coins. I spent quite some time looking for it, until I found it in .com (thanks for that). Mr David Sear is a well known and knowledgeable individual in ancient coins. This book is remarkable and I'm very happy with it. However, it would have been nicer if the prices given were in US dollars. But, it is still a great book and I would recommend it to any collector of ancient coins, young or old.

I use this as a numismatist of ancient coins and this book is my bible along with other books by this author. The research is thorough and comprehensive and you learn pots of Roman history. It will be a book always to be found on my shelf, if not on my desk or beside. This is my second copy and both are used like one uses a dictionary.

If you are interested in Roman coins, you know that the books by Sear are one of the few great resources out there to help you identify coins from this era. If you are not interested in Roman coins, this book is a paperweight. It's sort of an all or nothing thing.

Helped my wife determine value of her collection.
