May every day be a celebration of living Life-abetes until a cure!

Jayne Higgins, CPT, is a wellness consultant and certified personal trainer who has worked with the American Diabetes Association as an advocate in her home state of Maine. As Mrs. Maine America, Jayne focused on diabetes education as her platform. She has diabetes and is dedicated to the task of teaching people how to live better with diabetes.

Did the author actually eat any of the food from the recipes in this book? I will skip all of the artificial, organic, and transfat complaints and just say that the recipes taste horrible. Sweetener is added

when no sweetener is needed. What's the deal with just adding wheat flour to about every recipe? I actual cooked the Orange chicken recipe following the recipe exactly and I got black tar covered chicken that tasted like a orange frosting. Most of the recipes remind me of diet recipes from the 70's that my mother would force us to eat. If you are trying to make it difficult for some one newly diagnosed with diabetes to stay on a diet, mission accomplished.

The recipes are not consistent for how many people they serve. The go from 4, 5, 6 or 8 servings. It is very difficult to figure out how much 1 serving would be. Also, they seem to be somewhat unrealistic in size. They also have too many ingredients that are difficult to find and I would not like anyway. I am not using it at all and will probably donate it in the near future.

many of the recipes are duplicated. The yearly cycles are not consistent with ideas set forth. Most of the recipes have artificial sweetners and low fat oils both of which I do not believe are very healthy.

I don't normally do this but felt compelled to do so because I was so disappointed with this book. This book my as well be called the Splenda cookbook, or imitation egg cookbook, or margarine cookbook. Perhaps if `eating healthy' were taken out of the title of the book I would've have so peeved. I wish I had kept the receipt so I could get my money back. There are no pictures and it reads like a high school textbook with as much flare and personality. I did read a review online that touched on these issues but was desperate for a guidebook to help me plan my meals, as I am a fairly new type 1 diabetic. I would recommend the South Beach Diet book instead. Fake Food is not Healthy Food!

I would recommend this to anyone trying to keep blood sugar down, but more importantly to take off pounds with a safe and well-balanced meal plan. Choose your favorite days. you pick what you want to eat. I have lost about 1 pound a week eating lots of food and not feeling hungry or deprived. BTW - I am not diabetic, but love the balanced meal plans.

The book has a lot of tips on how to eat healthier, I'd say not just for diabetics, but anyone that wants to lose or maintain weight in a healthy manner. Has menu ideas for a weekly basis, for the four seasons and even has recipes. my only drawback is the book is a little "bulky". I've gotten used to a kindle sized e-reader, so to handle an actual book has become "clumsy". But that isn't the books fault. The book is GREAT!

This book is interesting and informative. I like the idea that the recipes are listed according to seasonal availability of primary ingredients, and this would be very helpful if I didn't live in the desert southwest. I grow some of my own organic vegetables and the growing seasons where I live are not the same as the seasons in most other parts of the country. Additionally, this book is written for families with a diabetic as recipes serve anywhere from 4 to 12. I can prepare a 4 serving recipe and refrigerate or freeze 3 servings for later use but, living alone, recipes for up to 12 servings are not a practical option for me. I gave the book to a diabetic neighbor who cooks for her family of 5.

do not like the way this book is organized and some of the meal plans are ridiculous. I am really going to open a can of beans for a 1/4 cup and not use them again in any other meal that week? Not realistic.
