North Carolina Butterflies & Moths: A Folding Pocket Guide To Familiar Species (A Pocket Naturalist Guide)

Synopsis

North Carolina's diverse habitats – from coastal dunes to wetlands to mountain ranges – provides ample habitat for a diverse butterfly population. The state insect – the eastern swallowtail – is one of over 1250 species of butterflies and moths found in this region. This beautifully illustrated guide highlights over 70 familiar and unique species and includes information on their life cycle and features illustrations of common caterpillars and pupae. Laminated for durability, this lightweight, pocket-sized folding guide is an excellent source of portable information and ideal for field use by visitors and residents alike. Made in the USA.

Customer Reviews

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Construction is durable and worthy of carrying into the field. Nine pages of 8 species on each page, plus one page of caterpillars and pupae. Each is labelled with popular name and scientific under it plus the size in inches and centimeters and many have notation of something unique to that specie. Very easy to use the accordian-type foldout design for ID work. Worth your time and money.

This is just a folder that expands to very basic information. I wanted more and there are easy books to find that fit the bill.

Exactly as described.

At first, I was rather disappointed at what I received for I thought it would going to be more of a "book" format, but in using it, I really like it for the information is short and to the point and I love that the lamination allows me to take it into the field without worrying about the pages becoming wet or damaged. I really like the product.
