Golden Guides first appeared in 1949 and quickly established themselves as authorities on subjects from Natural History to Science. Relaunched in 2000, Golden Guides from St. Martin's Press feature modern, new covers as part of a multi-year, million-dollar program to revise, update, and expand the complete line of guides for a new generation of students.

I have used this book since I was a child. I purchased the latest updated version of the book for a

friend of mine who is learning how to identify poisonous snakes from non-poisonous snakes. Living here in Florida, it is important that you learn to identify snakes so that you do not intentionally kill those that will not harm you. It is one of the best pocket sized books I have used for that purpose.

Purchased for granddaughter, age 5, and she loves all of these books about nature. I read to her about the things she gets interested in by the pictures.

This series of field guides is outstanding and very appropriate for my second graders with clear pictures and good basic information, one page per species. The reading level is a little higher than the grade I teach, but guides for "beginners" never have complete enough information to satisfy a second grader's questions. Highly recommend.

My 8 year old granddaughter loves these books and they are written on a level that she can understand them.

The Reptiles and Amphibians Golden Guide by Hobart M. Smith is fantastic. It is a very useful guide for learning more about and identifying reptiles and amphibians.

was the go to book on native reptiles&hibians when i was a kid,it was my wish book.Have had a copy for the last 35 yrs

I bought this book for my niece. Her eyes lit up when she saw it. I flipped through it and it does look very informative.

Just as i remembered 50 yrs ago and still gives hours of fun for my grandson who was thrilled with all the pictures
