Winningham's Critical Thinking Cases In Nursing: Medical-Surgical, Pediatric, Maternity, And Psychiatric, 6e

Synopsis

Highly regarded for its clinically relevant and thought-provoking content, *Winningham's Critical Thinking Cases in Nursing*, 6th Edition features 150 case studies that cover all four clinical practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. This edition reflects the most current standards of clinical practice, including content on pharmacology, nutrition, and diagnostic/laboratory tests to prepare you for all aspects of patient care. From nursing educators Mariann Harding and Julie Snyder, this workbook helps you develop your clinical nursing judgment and bridge the gap from nursing knowledge to nursing practice. Comprehensive case study approach uses cases drawn from actual clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Progressive case complexity builds on previous learning and helps you develop more and more expertise. 150 case studies cover all major clinical areas, including medical-surgical, pediatric, OB/maternity, and psychiatric cases, providing you with many diverse clinical situations and opportunities to apply knowledge and develop critical thinking skills. Body system organization makes the book easier to use with medical-surgical nursing textbooks and courses. NEW! QSEN icons highlight essential safety content. NEW! Increased emphasis on NCLEX® Exam-style alternate-format questions includes multiple-response, prioritization, and illustration-based questions, offering better NCLEX Examination preparation. NEW! Additional documentation questions and a NEW Chart View design provide more experience in documenting patient care based on real-world electronic chart formats. NEW! Reorganized format presents cases in three parts: 1) medical-surgical cases; 2) pediatric, maternity, and women's health cases; and 3) psychiatric and alternative therapies cases. NEW! Increased difficulty level includes more questions about care of older adults and multi-system situations. UPDATED content includes the latest clinical treatment guidelines, issues, and practice standards.

Customer Reviews

rationales not included

The book is good but there are not answers to guide you

does not contain answers or any help with the cases .. but good quality order

I don't study in these terms. This was a good book to study using case studies, though, if you were going to do it. It was helpful in thinking through how different processes can effect people in different ways. It was really helpful for some of the more complex concepts but I didn't start using it until near the end of nursing school because my teacher made me. I wish I had used it more. It is one of those things that you don't use every time for everything but as a supplement to things that really confuse you. I would recommend it, though.

I wish there was a section in the back that provided answer justifications otherwise this is a good tool to have for nursing school.

Always a big help. Just wish they could incorporate some of the older drugs that are still being used.

Paid for brand new book, the one that arrived was stained, crumpled and read. Unacceptable I would give zero stars if possible.

Fast shipping. Book as described. Item is listed as "new" and there was glue on the front cover and some ink smears on pages inside the book. However, it serves its purpose.
