Book by Zinza, Jason E.

I have a different book at my university for learning ASL, but my instructor, Bo Clements, recommended Master ASL!. He likes it much better, so I gave it a shot and bought this to go with it. I love it. So many different drills and fun ideas to practice with. Also, thoroughly explain number systems etc... to a full extent. Wonderful addition to the text. Anyone who is learning ASL and wants a better understanding and useful drills, this book is for you.

Used this book in my ASL Fingerspelling class. It has a lot of good practice drills. The explanations are for formal fingerspelling, not native fingerspelling you'd see from ASL fluent Deaf people. One big positive, this book has drills that show fingerspelling in 2-D space (not only the typical fingerspelling location); however, they aren't explained that way in the directions. We didn't use the glossing portion of the book in class.

This book has more of a workbook format, so it wasn't the best "guide" This is more of a practice book, to prove what you know. Although, I hope it very helpful for my ASL classes! :)

This book is excellent for learning Fingerspelling. It works together with "Master ASL...One."

It was the book I needed for class. Has many activities to practice signing. Really helps with fluency.

Needed this for a class and was in great shape.

In great condition
