ABC Oceans (AMNH ABC Board Books)

Synopsis

From Anemone to Zooplankton, this big, colorful board book will enchant and educate children! Filled with eye-catching photos of 26 sea animals, it features fun facts about each creature even as it teaches the ABCs. Kids will love meeting the great white shark, jellyfish, narwhal, octopus, vampire squid, and more!

Grade Level: Preschool - Kindergarten

Customer Reviews

The American Museum of Natural History in New York City is one of the largest and most respected museums in the world. Since the Museum was founded in 1869, its collections have grown to include more than 32 million specimens and artifacts relating to the natural world and human cultures. The Museum showcases its collections in the exhibit halls, and, behind the scenes, more than 200 scientists carry out cutting-edge research. It is also home to the Theodore Roosevelt Memorial, New York State's official memorial to its 33rd governor and the nation's 26th president, and a tribute to Roosevelt's enduring legacy of conservation. Approximately five million people from around the world visit the Museum each year. Plan a trip to the Museum, home of the world's largest collection of dinosaur fossils, or visit online at amnh.org.

I got this for a one year olds birthday, but want to buy one for my 3 and 7 year olds, too! I even learned some new things from it! This is not your typical ABC book. There is the perfect amount of info on each ocean animal, not overwhelming for little ones, but enough to keep it interesting for older kids. The pictures are beautiful and should definitely hold children's attention. This is the type of book that will keep a place in a child's library for quite a few years. Oh, and it's quite large. I didn't check the dimensions, but for the price I was expecting a much smaller book. I'll be buying several copies of this, as well as the others in the series and giving them as gifts. Will probably become my standby for very young children. It's really a great bang for your buck. I hope to see more children's books from the AMNH.

My wife and I bought a few of these AMNH ABC Board Books (Animals, Birds, Dinosaurs, Oceans) as a Christmas present for our 19-month old daughter, and she loves turning the pages and pointing at the pictures while we read the accompanying text aloud to her. The books are sturdy, and the pictures are vibrant and very eye-catching. We all have really enjoyed sharing these learning tools, and are very happy AMNH publishes them.

This book has great animals and pictures but like other reviewers it has weird animals too. I bought this as a gift already knowing but hopefully they like the overall animals of the book.

The children loved reading this in the library. The pictures are realistic and colorful. We are starting to recognize letters of the alphabet and this book was a winner.

I love these books! The American Museum of Natural History has really done a great job with this series of books. I have this one and the one about space. The pictures are real photographs and they are beautiful! The text is easy for little ones to understand and I love that it's a large board book so it's more durable than a regular paperback. My preschoolers love these books!

large board book

My daughter loves this book! Great price point for such a nice board book. Quick shipping too!

Love this book!!! We bought this at an Aquarium for my 4 year old. I love that it reinforces the names

of the animals we saw at the aquarium and adds some new ones. He read this book everyday for weeks; it is now one of his favorites. I highly recommend this book!
