Customer Reviews

These DK Workbooks are simply excellent. They have a full page of gold stickers to help keep our son motivated for each lesson. They have large lettering that is easy to read, and appropriate for a 2nd grade level. My son likes to do these on his own and at his own pace with the easy-to-follow directions for each lesson. We have purchased every DK Workbook for 1st and 2nd grade now. Highly recommended to bridge the school break over the summer. Buy them for your child, you

won't regret it, and they will thank you later! These books also meet the common core state standards. You might think I work for DK workbooks with how much I have raved about them - I only want to get the word out how good these are and hope they keep making them for higher grades.

This book is great!! I liked it because unlike a lot of other books I have found I didn't have to rush out and buy equipment to do experiments with. My children go to school during the day and we do an hour after school in books. This works perfect for us due to not needing to do tons of experiments but helping them learn things that would get looked over with common core. The book also was surprisingly bigger and more pages then we were expecting!! The order of the book also made sense and flowed for them to easily comprehend from each chapter!

When I read the review it said that this would be better for 1st grade but once I got it and looked there was too much reading to be appropriate for 1st grade. I think it's best for 2nd so I'll save it for next year.

My daughter loves this book, it's a really great enrichment for her as she has not done science in school this entire year in 2nd grade. Thanks, standardized testing.....

This book is wonderful. My child likes the gold stars that are included. I allow my child to choose the page and then we also review the last 2 pages we completed during our last study of science. Perfect for my second grader to start being interested in science.

Both my 7 and 8 year old Grand Daughters love this book. It really peaked their interest in science. Of all the books I got for them this was the one they decided to start with.

I use this for homeschooling my 3rd grader. Fun book and very simple to use. i WaS Very Pleased On How Simple The WorkBook Is Due To My Daughter Having Autism She LovEs it.

The reward system, is a star sticker for EVERY SINGLE PAGE THAT HAS BEEN FINISHED! Cheapens the "reward system" IMHO. Great content though, just not enough repetition/practicing of each concept.
